

HEIGHT ADJUSTABLE WORK BENCH

Built with industry in mind, this rugged height adjustable work bench with push button adjustability and industry forward design will have everyone on your shop floor asking for one. Industry leading electric actuators provide up to 18" of ergonomic height adjustment at the touch of a button while an over built, reinforced steel frame puts this unit miles ahead of comparable office grade equipment. Over sized, smooth glide locking casters provide effortless mobility when in motion but lock out for stability when in use. A variety of options such as bench top material, size, and frame finish options will ensure you get a unit built to your specific needs. Tall or small, Dectron's ergonomic equipment has got you covered!
